FINE MIST SPRAYER

www.packaging-usa.com

FINE MIST SPRAYER

Our fine-mist sprayer head transforms liquid into a whisper-light veil of droplets, delivering a soft, uniform mist rather than a heavy stream. Its precision-engineered actuator and internal insert work together to produce a shorter, smoother spray pattern that feels weightless on skin and hair. A built-in lock and protective dust cap guard against accidental discharge, making it travel-ready and salon-safe.

Key Features
Versatile Compatibility – Designed to fit various bottle materials and styles, including PET and glass.
Customizable Design Options – Tailor colors, finishes, and components to align with your brand identity.
Precision Insert- Micro-machined orifice shapes fluid into ultra-fine droplets
Multi-Part Actuator- Internal piston, stem & spring deliver consistent, clog-free performance
Soft-Touch Actuation-Low-force pump stroke—comfortable for repeated use
Lock-In Safety- Twist-or-snap lock prevents unintentional spraying
Dust-Shield Cap- Clear PP cover keeps nozzle sanitary and leak-proof
Thin-Wall Dip Tube- Slim, angled tube reaches every last drop in the bottle
Chemical-Resistant Gasket- Custom elastomer seal options ensure compatibility with oils, alcohols, and water-based formulas
