REFILLABLE JAR

www.packaging-usa.com

REFILLABLE JAR (70%PCR)

Discover sustainable beauty packaging with APR's innovative refillable PET jars, now available in 30ml, 40ml, and 50ml sizes. These jars are designed with sustainability, simplicity, and functionality in mind — ideal for skincare, personal care, and cosmetic products.

Key Features

Refillable System: The inner pod can be easily replaced, allowing the outer jar to be reused —supporting a more sustainable, low-waste packaging solution.

Mono-Material PET Construction: Made from high-quality PET material, the entire jar is recyclable and designed with environmental responsibility in mind.

70% PCR Content: Produced using post-consumer recycled resin, further reducing environmental impact.

Customizable Design: Sleek and modern with clean lines—can be tailored to your brand's unique needs through custom colors and finishes.
